GURMEHAK KAUR

Software Engineer | Full Stack | Go • React • Next.js • Node.js

+91 7973086834 | gurmehakkaur52@gmail.com | LinkedIn | GitHub | Portfolio
LeetCode | CodeChef | HackerRank

WORK EXPERIENCE

Full Stack Developer Intern — **June 2026 — Current**

Rocket Global Technologies — Bangalore (On-site)

- Owned end-to-end integration of the mobile recharge workflow, developing responsive Next.js interfaces, backend APIs, and external integrations to support recharge transactions across multiple operators.
- Integrated multiple third-party vendors into the platform, implementing vendor-specific APIs and transaction workflows for seamless payment processing.
- Designed and developed responsive, production-ready interfaces while working directly with founders and engineering stakeholders to translate product requirements and feedback into features from development through delivery.

Software Development Engineer Intern — **Sep 2025 — Apr 2026**

Pratisthan Software Ventures — Bangalore (On-site)

- Integrated network directory validation logic for the UKBACS payment system and developed component-test scripts to execute payment workflows, identify issues, and debug integration failures.
- Developed and optimized backend services for UK payment systems including UKFPS, BACS, and CHAPS, implementing payment workflows and validation requirements.
- Built and maintained unit tests and CI/CD automation to improve reliability across payment-processing workflows.

PROJECTS

Aarogya Care | **MERN Stack, Tailwind CSS** — **Live** | **Admin**

- Built a full-stack healthcare platform with JWT authentication, role-based authorization, and authenticated workflows for doctors, patients, and administrators.
- Developed doctor and patient management workflows including doctor profiles, appointment scheduling, profile management, and role-specific dashboards across 15+ REST APIs.
- Integrated Razorpay for payment processing and conducted security-focused testing across authenticated workflows, validating authorization and core application flows.

CompileX | **React, Judge0 API** — **Live** | **GitHub**

- Built a **browser-based online IDE** with **real-time code compilation** and execution using the Judge0 API, supporting multiple programming languages.
- Designed reusable editor components with persistent workspace management using Local Storage.
- Implemented robust loading, error handling and execution feedback to improve the developer experience.

SKILLS

Languages	Go, TypeScript, JavaScript, C++, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn/UI
Backend	Node.js, Express.js, REST APIs, JWT
Databases	PostgreSQL, MongoDB, MySQL, Redis
Infrastructure	Git, GitHub, RabbitMQ, CI/CD, Postman

ACHIEVEMENTS

- Solved 1200+ DSA problems across LeetCode (750+), GeeksforGeeks, CodeChef (1510, 2 stars), and HackerRank (5 stars C++).
- Secured 1st Runner-Up (2nd Place) in Code Slam Hackathon and Codeathon, competing against 110+ teams. Certificate
- Advanced to Round 2 of Adobe Gensolve, ranking among the top 5% of participants. Certificate

EDUCATION

BE CSE: Chitkara University, CGPA: 8.7/10 — **Sep 2022 – May 2026**
